

	The # Operator	324
	The ## Operator	324
	General Properties of Macros	325
	Parentheses in Macro Definitions	326
	Creating Longer Macros	328
	Predefined Macros	329
	Additional Predefined Macros in C99	330
	Empty Macro Arguments	331
	Macros with a Variable Number of Arguments	332
	The __func__ Identifier	333
<b>14.4</b>	<b>Conditional Compilation</b>	<b>333</b>
	The #if and #endif Directives	334
	The defined Operator	335
	The #ifdef and #ifndef Directives	335
	The #elif and #else Directives	336
	Uses of Conditional Compilation	337
<b>14.5</b>	<b>Miscellaneous Directives</b>	<b>338</b>
	The #error Directive	338
	The #line Directive	339
	The #pragma Directive	340
	The _Pragma Operator	341
<b>15</b>	<b>WRITING LARGE PROGRAMS</b>	<b>349</b>
<b>15.1</b>	<b>Source Files</b>	<b>349</b>
<b>15.2</b>	<b>Header Files</b>	<b>350</b>
	The #include Directive	351
	Sharing Macro Definitions and Type Definitions	353
	Sharing Function Prototypes	354
	Sharing Variable Declarations	355
	Nested Includes	357
	Protecting Header Files	357
	#error Directives in Header Files	358
<b>15.3</b>	<b>Dividing a Program into Files</b>	<b>359</b>
	Program: Text Formatting	359
<b>15.4</b>	<b>Building a Multiple-File Program</b>	<b>366</b>
	Makefiles	366
	Errors During Linking	368
	Rebuilding a Program	369
	Defining Macros Outside a Program	371
<b>16</b>	<b>STRUCTURES, UNIONS, AND ENUMERATIONS</b>	<b>377</b>
<b>16.1</b>	<b>Structure Variables</b>	<b>377</b>
	Declaring Structure Variables	378
	Initializing Structure Variables	379
	Designated Initializers	380
	Operations on Structures	381
