

	Printing the Value of a Variable	19
	Program: Computing the Dimensional Weight of a Box	20
	Initialization	21
	Printing Expressions	22
2.5	Reading Input	22
	Program: Computing the Dimensional Weight of a Box (Revisited)	22
2.6	Defining Names for Constants	23
	Program: Converting from Fahrenheit to Celsius	24
2.7	Identifiers	25
	Keywords	26
2.8	Layout of a C Program	27
3	FORMATTED INPUT/OUTPUT	37
3.1	The <code>printf</code> Function	37
	Conversion Specifications	38
	Program: Using <code>printf</code> to Format Numbers	40
	Escape Sequences	41
3.2	The <code>scanf</code> Function	42
	How <code>scanf</code> Works	43
	Ordinary Characters in Format Strings	45
	Confusing <code>printf</code> with <code>scanf</code>	45
	Program: Adding Fractions	46
4	EXPRESSIONS	53
4.1	Arithmetic Operators	54
	Operator Precedence and Associativity	55
	Program: Computing a UPC Check Digit	56
4.2	Assignment Operators	58
	Simple Assignment	58
	Lvalues	59
	Compound Assignment	60
4.3	Increment and Decrement Operators	61
4.4	Expression Evaluation	62
	Order of Subexpression Evaluation	64
4.5	Expression Statements	65
5	SELECTION STATEMENTS	73
5.1	Logical Expressions	74
	Relational Operators	74
	Equality Operators	75
	Logical Operators	75
5.2	The <code>if</code> Statement	76
	Compound Statements	77
